Opis

REDSHIFT ShockStop PRO Suspension Stem for Bicycles, Shock-Absorbing Bike Handlebar Stem for Road, Gravel, Hybrid, and E-Bikes, 6 Degree x 110 mm

Producent: Redshift Sports

Poczuj różnicę podczas jazdy! Zawieszenie kierownicy REDSHIFT ShockStop PRO to doskonała aktualizacja dla Twojego roweru - łagodzi wibracje, zapewniając Ci komfortową jazdę na najbardziej wymagających trasach. Zawieszenie odbiera aż do 70% wstrząsów, redukując zmęczenie i zwiększając kontrolę. Dzięki lepszemu tłumieniu możesz pokonywać dalsze trasy i osiągać wyższe prędkości!

Ta lekka wersja zawieszenia REDSHIFT ShockStop PRO waży aż 15% mniej niż poprzednia! Wyposażona w lekki osprzęt tytanowy, wysokiej jakości wykończenie polerowane oraz precyzyjne frezowanie CNC dla redukcji wagi. Znajdź idealny balans pomiędzy amortyzacją a stabilnością, bez utraty precyzji kierowania.

Zapomnij o zmęczonych dłoniach, nadgarstkach i plecach! Zyskaj większą pewność siebie, kontrolę oraz płynniejszą jazdę dzięki zawieszeniu REDSHIFT ShockStop PRO. Dostosuj do swojego stylu jazdy z 5 wymiennymi elastomerami. Proste w instalacji i bezobsługowe - idealne ulepszenie dla każdego rowerzysty!

- **RIDE FURTHER, FASTER, AND MORE COMFORTABLY** – The ShockStop bike handlebar suspension stem is the perfect upgrade to your e-bike, gravel bike, hybrid, or road bike. Float over obstacles and dampen vibrations so you can ride longer, go faster, and stay in control even on the roughest terrain.
- **15% LESS WEIGHT WITH A PREMIUM FINISH** – The new PRO version of our shock-absorbing bike stem for road, gravel, hybrid, and e-bikes is 15% lighter! It features lightweight titanium hardware, a high quality polished finish, and additional precision CNC machining to reduce weight.
- **UP TO 70% BUMP AND VIBRATION DAMPENING** – Say goodbye to sore hands, wrists, back, and neck and say hello to increased control, more confidence, and a super smooth ride. With 20mm of damped suspension travel the ShockStop shock absorber bike stem reduces the effects of impacts and vibrations by up to 70%. Just the right amount of vertical compliance without sacrificing any stability or compromising steering.
- **REDUCE FATIGUE AND INCREASE EFFICIENCY**– Stop wasting energy absorbing impacts and vibrations with your body. This suspension stem for bicycles dampens bumps and vibrations which reduce fatigue and enable you to go further and faster on the bike you already own.
- **EASY TO INSTALL AND MAINTENANCE FREE** – The ShockStop stem fits all modern bikes with standard 1 1/8in (28.6mm) steerer tubes and 31.8mm handlebars (shims available for 25.4mm and 26.0mm bars). It comes in a flippable +/-6 degree angle in 80, 90, 110, 110, and 120mm lengths and in a +30 degree angle in a 100mm length. Fine tune the suspension feel to match your unique riding style with the 5 included swappable elastomers.

- **Opis produktu:** REDSHIFT ShockStop Pro Suspension Stem Enjoy the same shock-absorbing benefits of the standard ShockStop Stem with 15% less weight and a premium finish with the new Shockstop Pro Suspension Stem. A simple upgrade to the bike you already own rather than having to invest in a brand new bike, the ShockStop bicycle handlebar suspension stem is one of the most cost-effective ways of unlocking more comfort on your bike. The Pro stem features titanium hardware and extensive CNC machining to reduce weight, sporting a sleek new polished finish. Ride Further ~ Ride Faster ~ Maintain Control This shock-absorbing front-end bike suspension stem effectively absorbs bumps and vibrations up to 70%. 20mm of suspension travel at the handlebars unobtrusively smooths out rough terrain, reducing the fatigue that happens as your body absorbs bumps and vibration. Ride further, faster and more enjoyably without compromising steering responsiveness. Tunable stiffness allowing riders to customize the feel to their weight and handling preference. It easily installs in less than 15 minutes, and requires no complicated maintenance. Stem Details Refined premium finish. Material: 6061 T6 Aluminum with Titanium Hardware Rise: +/- 6 degrees with 80mm, 90mm, 100mm, 110mm, 120mm lengths Effective suspension travel: Up to 20mm Includes 5 swappable elastomers to fine-tune your riding style Steerer Tube (Fork) Diameter: 28.6mm Handlebar Clamp Diameter: 31.8mm
