

# Symulacyjne Szkolenie w Oparciu o Doświadczenie i Analizę Aktywności: Medycyna i Bezpieczeństwo

Indeks: **744099** Producent: **Springer** Kod producenta: **9783030895693**

Cena: **568.47 zł**

## Opis

### Simulation Training through the Lens of Experience and Activity Analysis: Healthcare, Victim Rescue and Population Protection (Professional and Practice-based Learning, Band 30)

Producent: Springer

- **temat:** Adult education, continuous learning, Industrial or vocational training, Medicine: general issues, Personnel & human resources management, Teaching of a specific subject, BUSINESS & ECONOMICS / Human Resources & Personnel Management, EDUCATION / Counseling / Career Development, Education / Adult & Continuing Education, Education / Professional Development, Education/Counseling - Career Development, Medical / Education & Training, ANF: Careers, Adult & Continuing Education, Adult Education, Adult education, continuous learning, BUSINESS & ECONOMICS, BUSINESS & ECONOMICS / Human Resources & Personnel Management, Berufsausbildung, Betriebswirtschaft, Business & Economics/Human Resources & Personnel Management, Career, Career Development, Counseling, Counseling - Career Development, EDUCATION, EDUCATION / Adult & Continuing Education, EDUCATION / Counseling / Career Development, EDUCATION / Professional Development, Education & Training, Education/Adult & Continuing Education, Education/Counseling - Career Development, Education/Professional Development, Erwachsenenbildung, Erwachsenenbildung, lebenslanges Lernen, Fachspezifischer Unterricht, HC, HC/Pädagogik/Erwachsenenbildung, HC/Wirtschaft/Betriebswirtschaft, Hardcover, Softcover, Hardcover, Softcover / Pädagogik/Erwachsenenbildung, Human Resource Development, Human Resources & Personnel Management, Industrial or vocational training, MEDICAL, MEDICAL / Education & Training, Medical Education, Medical/Education & Training, Medicine - Study and teaching - Simulation methods, Medicine: general issues, Medizin, allgemein, Non-Fiction, Occupational training - Simulation methods, Personalmanagement, HRM, Personnel & human resources management, Personnel and human resources management, Professional Development, Professional and Vocational Education, Public safety - Study and teaching - Simulation methods, Pädagogik, Rescue work - Study and teaching - Simulation methods, Simulation training and risk management, Simulation-based learning in healthcare, Simulation-based learning in healthcare; psychological validity of training simulations; role-playing-games; virtual simulation environment; training of healthcare professionals in geriatrics; situated cognition approaches; civil security crisis simulations; Simulation training and risk management; urban fire simulation; high-intensity simulated training; activity-based training design; use-of-force simulation-based training; decision-making in police training facilities, Simulation-based learning in healthcare; psychological validity of training simulations; virtual simulation environment; training of healthcare professionals in geriatrics; situated cognition approaches; civil security crisis simulations; Simulation training and risk management; urban fire simulation; high-intensity simulated training; activity-based training design; use-of-force simulation-based training; decision-making in police training facilities; role-playing-games, Simulation-based learning in healthcare; psychological validity of training simulations; role-playing-games; virtual simulation environment; training of healthcare professionals in geriatrics; situated cognition approaches; civil security crisis simulations; Simulation training and risk management; urban fire simulation; high-intensity simulated training; activity-

based training design;use-of-force simulation-based training;decision-making in police training facilities, TEXT, Teaching of a specific subject, Verstehen, Wirtschaft, activity-based training design, civil security crisis simulations, decision-making in police training facilities, high-intensity simulated training, psychological validity of training simulations, role-playing-games, situated cognition approaches, training of healthcare professionals in geriatrics, urban fire simulation, use-of-force simulation-based training, virtual simulation environment, Berufsausbildung, Erwachsenenbildung, lebenslanges Lernen, Fachspezifischer Unterricht, Medizin, allgemein, Personalmanagement, HRM, Personnel and human resources management, HC/Pädagogik/Erwachsenenbildung, HC/Wirtschaft/Betriebswirtschaft, Hardcover, Softcover / Pädagogik/Erwachsenenbildung

- **wiązący:** paperback
- **język:** english, english, english
- **waga przedmiotu:** 504 grams
- **strony:** 328
- **słowo kluczowe tematu:** Simulation-based learning in healthcare, Simulation-based learning in healthcare; psychological validity of training simulations; role-playing-games; virtual simulation environment; training of healthcare professionals in geriatrics; situated cognition approaches; civil security crisis simulations; Simulation training and risk management; urban fire simulation; high-intensity simulated training; activity-based training design; use-of-force simulation-based training; decision-making in police training facilities, Simulation-based learning in healthcare; psychological validity of training simulations; virtual simulation environment; training of healthcare professionals in geriatrics; situated cognition approaches; civil security crisis simulations; Simulation training and risk management; urban fire simulation; high-intensity simulated training; activity-based training design; use-of-force simulation-based training; decision-making in police training facilities; role-playing-games, Simulation-based learning in healthcare;psychological validity of training simulations;role-playing-games;virtual simulation environment;training of healthcare professionals in geriatrics;situated cognition approaches;civil security crisis simulations;Simulation training and risk management;urban fire simulation;high-intensity simulated training;activity-based training design;use-of-force simulation-based training;decision-making in police training facilities, civil security crisis simulations, psychological validity of training simulations, role-playing-games, situated cognition approaches, training of healthcare professionals in geriatrics, virtual simulation environment
