Opis

Data Analysis with Python and Pyspark

Producent: Manning Publications

Data Processing with Python and Pyspark is the ultimate guide for anyone seeking to master the art of data analysis. This comprehensive book has been designed to help data scientists and analysts work efficiently with large data sets. With this book, you'll learn how to harness the power of Python and Pyspark to process large amounts of data quickly and accurately. Whether you're working with big data in distributed systems, building a data pipeline, or troubleshooting data processing issues, this book has got you covered.

The book covers a range of topics, including data abstraction and scale, data management, troubleshooting, and more. You'll learn about the most popular data processing tools such as Pandas, R, SAS, Spark, and Hadoop, and how to use them to their full potential. You'll also learn how to process data in multiple machines and how to manage distributed systems.

This book is perfect for anyone who wants to take their data analysis skills to the next level. Whether you're new to data analysis or an experienced professional, you'll find everything you need in Data Processing with Python and Pyspark. So why wait? Get your copy today and start processing big data like a pro!
