

# Analiza i Projektowanie Algorytmów Komputerowych

Indeks: **739169** Producent: **Addison Wesley** Kod producenta: **A-332-076**

Cena: **427.15 zł**

## Opis

### Design and Analysis of Computer Algorithms, The Producent: Addison Wesley

Algorithms: Design & Analysis is suitable for both beginners and advanced readers, offering in-depth insights into the world of computer algorithms. From reference works to trivia & quiz question books, this book covers a wide range of topics related to Computer Science and Programming. Whether you're a student, a professional in the field, or simply curious about algorithms, this book has something to offer for everyone.

Explore the world of algorithms with Algorithms: Design & Analysis and enhance your knowledge of computer science and software engineering. Dive into the intricate details of algorithms and data structures, and discover the fascinating world of computer programming. With its engaging content and informative approach, this book is a must-have for anyone seeking to expand their understanding of computer algorithms.

## Parametry

Autor	Addison Wesley
Liczba stron	około 400
Wydanie	2023

**Alfred V. Aho** is a member of the technical staff at Bell Telephone Laboratories in Murray Hill, N.J., chairman of the computer sciences program committee at Stevens Institute of Technology, and vice chairman of the ACM special interest group on automata and complexity theory. He has published *The Theory of Parsing, Translation, and Compiling*, Volumes 1 and 2, and *Currents in the Theory of Computing*. Dr. Aho earned the B.A.Sc. degree at the University of Toronto and the M.A. and Ph.D. degrees at Princeton University.

A professor in the computer science department at Cornell University, **John E. Hopcroft** is a member of the National Science Foundation advisory panel on computer science and managing editor for the *SIAM Journal of Computing*. He has been a consultant for Bell Telephone Laboratories and for the System Development Corporation. Dr. Hopcroft is the coauthor of *Formal Languages and Their Relation to Automata* (Addison-Wesley, 1969). He received his M.B. and Ph.D. degrees from Stanford University.

**Jeffrey D. Ullman** is professor of electrical engineering at Princeton University. Formerly, he was a member of the technical staff at Bell Telephone Laboratories. He is the coauthor of *Formal Languages and Their Relation to Automata* with John Hopcroft and *The Theory of Parsing, Translation, and Compiling*, Volumes 1 and 2, with Alfred Aho. Dr. Ullman earned the B.S. degree at Columbia University and the Ph.D. degree at Princeton University.
