Producent: Bio8

Parametry

Pojemność	5L
Typ	Naturalny enzymatyczny
Przeznaczenie	Usuwanie tłuszczu
Producent	Bio8

Zdjęcia

GREASE TRAP FLUID

SHAKE BOTTLE WELL BEFORE USE

DO NOT flush chemical based cleaners down the sinks and drains.
For best results, apply directly to affected drain or grease trap.

FOR COMMERCIAL KITCHENS

Seeding Dose must be applied directly to the Grease Trap,
preferably at night after the kitchen has closed.

Seeding Dose rate: 1 litre per m²

Daily Maintenance Dose:

Up to 500 meals a day - 500ml

1,000 meals a day - 1000ml

1,500 meals a day - 1500ml

2,000 meals a day - 2 litre

Automatically dose 2 hours after kitchen closes

FOR DOMESTIC APPLICATIONS

To breakdown blockages caused by fats, oils and
greases fill sink with WARM water. Add 500ml - 1L

of product to sink and allow to sit out mixture down
drain in a controlled/slow manner. For best results

work fast filling at night, leaving the product
several hours to work before the sink is used again.

The longer you can leave in contact with the grease
the better. Stubborn blockages may need several

treatments! For Weekly Maintenance: repeat process
adding 500ml to sink water and drain. Unblock Drain Manually:

Shake bottle well and add 500ml directly to affected
drain and leave for a minimum of 8 hours

(preferably overnight)
