

Inżynieria Kosztów: Praktyczny Przewodnik po Zrównoważonym Generowaniu Zysków w Produkcji

Indeks: **716126** Producent: **CRC Press** Kod producenta: **9780367440831**

Cena: **438.12 zł**

Opis

Cost Engineering: A Practical Method for Sustainable Profit Generation in Manufacturing

Producent: CRC Press

- **temat:** Economics, Operational research, Project management, Quality Assurance (QA) and Total Quality Management (TQM), Production and quality control management, Manufacturing industries, Engineering: general, Hydraulic engineering, Production and industrial engineering, Quality Assurance (QA) & Total Quality Management (TQM), Production & quality control management, Engineering - general, Production engineering, BUSINESS & ECONOMICS / Economics / General, BUSINESS & ECONOMICS, General, BUSINESS & ECONOMICS / Development / Sustainable Development, Development, Sustainable Development, TECHNOLOGY & ENGINEERING / Civil / General, TECHNOLOGY & ENGINEERING, Civil, TECHNOLOGY & ENGINEERING / Industrial Engineering, Industrial Engineering, TECHNOLOGY & ENGINEERING / Manufacturing, Manufacturing, Gap Driver;Cycle Time;Business Case;Gross Weight;Automotive OEM;Electric Vehicle;Cost Engineering;Cost Reduction Ideas;Real Life Anecdote;Cost Target;Manufacturing Overhead;Cost Engineering Process;Cost Optimization;Corporate Overhead;Cost Reduction Opportunities;Key Cost Drivers;Collaborative Product Development Process;Matching Talents;PLM System;Soviet Union Period;Hot Forge Process;Powerful Competitive Advantage;Quoting Process;Allocation Method;Resulting Cycle Times, BUSINESS & ECONOMICS / Development / Sustainable Development, BUSINESS & ECONOMICS / Economics / General, Business & Economics/Corporate Finance - General, Business & Economics/Development - Sustainable Development, Business & Economics/Economics - General, TECHNOLOGY & ENGINEERING / Civil / General, TECHNOLOGY & ENGINEERING / Industrial Engineering, TECHNOLOGY & ENGINEERING / Manufacturing, TECHNOLOGY & ENGINEERING / Metallurgy, Technology & Engineering/Civil - General, Technology & Engineering/Industrial Engineering, Technology & Engineering/Manufacturing, Economics of industrial organisation, Engineering - general, Production & quality control management, Production engineering, Quality Assurance (QA) & Total Quality Management (TQM), Economics, Economics of industrial organization, Engineering: general, Hydraulic engineering, Manufacturing industries, Operational research, Production and industrial engineering, Production and quality control management, Project management, Quality Assurance (QA) and Total Quality Management (TQM), Cost effectiveness., Engineering economy., Product design.
- **wiązący:** hardcover
- **język:** english, english, english
- **waga przedmiotu:** 363 grams
- **strony:** 162
- **słowo kluczowe tematu:** Cost Optimization; Gap Driver; Cycle Time; Gross Weight; Business Case; Cost Engineering; Cost Target; Cost Reduction Ideas; Real Life Anecdote; Corporate Overhead; Manufacturing Overhead; Cost Engineering Process; Electric Vehicle; Automotive OEM; Cost Reduction Opportunities; Key Cost Drivers; Collaborative Product Development Process; Matching Talents; PLM System; Soviet Union Period; Hot Forge Process; Powerful Competitive Advantage; Quoting Process; Allocation Method; Resulting Cycle Times, Gap Driver;Cycle

Time;Business Case;Gross Weight;Automotive OEM;Electric Vehicle;Cost Engineering;Cost Reduction Ideas;Real Life Anecdote;Cost Target;Manufacturing Overhead;Cost Engineering Process;Cost Optimization;Corporate Overhead;Cost Reduction Opportunities;Key Cost Drivers;Collaborative Product Development Process;Matching Talents;PLM System;Soviet Union Period;Hot Forge Process;Powerful Competitive Advantage;Quoting Process;Allocation Method;Resulting Cycle Times, Non-Fiction, SCI/TECH, Science/Math

- **marka:** CRC Press
- **kod unspsc:** 55101500
- **kod podmiotu:** KC, KCD, TBC, TNF, KND, KJT, TGP, KJMV5, KJMP, KJMQ, BUS072000, BUS069000, BUS017000, BUS072000, BUS069000, TEC009020, TEC009060, TEC020000, TEC023000, TEC009020, TEC009060, TEC020000, KCD, TBC, KJMV5, TGP, KJMQ
- **grupa docelowa:** Professional and scholarly
- **Liczba przedmiotów:** 1
- **numer części:** 9780367440831
- **waga opakowania przedmiotu:** 0.37 kilograms
- **wydanie:** 1
- **zewnętrznie przypisany identyfikator produktu:** 0367440830, 9780367440831, 09780367440831
- **producent:** CRC Press
- **autor:** Domanski, Chris
- **gatunek muzyczny:** Economics, Operational research, Project management, Quality Assurance (QA) and Total Quality Management (TQM), Production and quality control management, Manufacturing industries, Engineering: general, Hydraulic engineering, Production and industrial engineering, Economics, Operational research, Project management, Quality Assurance (QA) & Total Quality Management (TQM), Production & quality control management, Manufacturing industries, Engineering - general, Hydraulic engineering, Production engineering, BUSINESS & ECONOMICS, Economics, General, BUSINESS & ECONOMICS, Development, Sustainable Development, TECHNOLOGY & ENGINEERING, Civil, General, TECHNOLOGY & ENGINEERING, Industrial Engineering, TECHNOLOGY & ENGINEERING, Manufacturing
- **Data publikacji:** 2020-04-07T00:00:01Z
- **numer wydania:** 1
- **nazwa przedmiotu:** Cost Engineering: A Practical Method for Sustainable Profit Generation in Manufacturing
- **data premiery:** 2020-04-07T00:00:01Z
- **data uruchomienia strony produktu:** 2020-04-02T04:21:55.125Z

Parametry

Gatunek	Edukacja, Inżynieria, Ekonomia
Język	Polski
Format	Hardcover
Data publikacji	2020-04-07
Wydanie	1
