
Koncepcja emisji cząstek i prawdopodobieństwo rozwoju infekcji w systemach

Indeks: **831169** Producent: **Springer** Kod producenta: **9783030694999**

Cena: **233.78 zł**

Opis

Particle emission concept and probabilistic consideration of the development of infections in systems: Dynamics from logarithm and exponent in the infection process, percolation effects

Producent: Springer

- **temat**: Probability & statistics, Public health & preventive medicine, Stochastics, Virology (non-medical), MATHEMATICS / Probability & Statistics / General, MATHEMATICS, Probability & Statistics, General, MEDICAL / Public Health, MEDICAL, Public Health, MEDICAL / Biostatistics, Biostatistics, SCIENCE / Life Sciences / Virology, SCIENCE, Life Sciences, Virology, Applied Statistics, Applied Probability, Statistics, HC/Mathematik/Wahrscheinlichkeitstheorie, Stochastik, Mathematische Statistik, HC, Mathematik, Wahrscheinlichkeitstheorie, Stochastik, Mathematische Statistik, HC/Medizin/Allgemeines, Medizin, Allgemeines, HC/Biologie/Mikrobiologie, Biologie, Mikrobiologie, Spread of biological infections;corona virus;Distribution rate and contact rate;Basis for a probabilistic forecast;Doubts about statistical surveys;The difference between influenza flu and COVID wave;Analysis of density Eqb;Addition of the parameter Kurtosis to the density Eqb4;Prediction using the density function;Principles for exponential propagation;Logarithm of historical data;Hygiene consequences;Handshake;Breathing air (aerosols);Prediction using the density function;Dynamic exponent;Incidence under probabilistic aspects;On the percolation theory COVID;Principles of percolation-interface effects;Consequences of the percolation effect;Public Healthcare, Probability and statistics, Public health and preventive medicine, Microbiology (non-medical), MATHEMATICS / Probability & Statistics / General, MEDICAL / Biostatistics, MEDICAL / Public Health, Mathematics/Probability & Statistics - General, Medical/Biostatistics, Medical/Microbiology, Medical/Public Health, SCIENCE / Life Sciences / Virology, Science/Life Sciences - Virology, Life sciences: general issues, Medical microbiology & virology, Medical microbiology & virology, Probability & statistics, Probability & statistics, Public health & preventive medicine, Public health & preventive medicine, Stochastics, Virology (non-medical), Medical microbiology and virology, Microbiology (non-medical), Mikrobiologie (nicht-medizinisch), Probability and statistics, Public Health und Präventivmedizin, Public health and preventive medicine, Stochastik, Wahrscheinlichkeitsrechnung und Statistik, HC/Biologie/Mikrobiologie, HC/Mathematik/Wahrscheinlichkeitstheorie, Stochastik, Mathematische Statistik, HC/Medizin/Allgemeines, Hardcover, Softcover / Mathematik/Wahrscheinlichkeitstheorie, Stochastik, Mathematische Statistik
- **wiążący**: paperback
- **język**: english, english, english
- **waga przedmiotu**: 174 grams
- **strony**: 123
- **słowo kluczowe tematu**: Corona Virus; Distribution rate and contact rate; Basis for a probabilistic forecast; Doubts about statistical surveys; The difference between influenza flu and COVID wave; Analysis of density Eqb; Spread of biological infections; Addition of the parameter Kurtosis to the density Eqb4; Prediction using the density function;

Principles for exponential propagation; Logarithm of historical data; Hygiene consequences; Handshake; Breathing air (aerosols), Non-Fiction, Science/Math, Spread of biological infections; Distribution rate and contact rate; Basis for a probabilistic forecast; Doubts about statistical surveys; The difference between influenza flu and COVID wave; Analysis of density Eqb; Addition of the parameter Kurtosis to the density Eqb4; Prediction using the density function; Principles for exponential propagation; Logarithm of historical data; Hygiene consequences; Handshake; Breathing air (aerosols); Dynamic exponent; Incidence under probabilistic aspects; On the percolation theory COVID; Principles of percolation-interface effects; Consequences of the percolation effect; corona virus; Public Healthcare, Spread of biological infections; corona virus; Distribution rate and contact rate; Basis for a probabilistic forecast; Doubts about statistical surveys; The difference between influenza flu and COVID wave; Analysis of density Eqb; Addition of the parameter Kurtosis to the density Eqb4; Prediction using the density function; Principles for exponential propagation; Logarithm of historical data; Hygiene consequences; Handshake; Breathing air (aerosols); Prediction using the density function; Dynamic exponent; Incidence under probabilistic aspects; On the percolation theory COVID; Principles of percolation-interface effects; Consequences of the percolation effect; Public Healthcare, Spread of biological infections;corona virus;Distribution rate and contact rate;Basis for a probabilistic forecast;Doubts about statistical surveys;The difference between influenza flu and COVID wave;Analysis of density Eqb;Addition of the parameter Kurtosis to the density Eqb4;Prediction using the density function;Principles for exponential propagation;Logarithm of historical data;Hygiene consequences;Handshake;Breathing air (aerosols);Prediction using the density function;Dynamic exponent;Incidence under probabilistic aspects;On the percolation theory COVID;Principles of percolation-interface effects;Consequences of the percolation effect;Public Healthcare, Switzerland, TEXT
