Opis

Lakos: Process and Architecture, Volume 1

Producent: Addison Wesley

Expert C++: Processes and Architecture is the ultimate guide to mastering the architecture of modern C++ applications. Written by renowned software engineer John Lakos, this book goes beyond the basics of C++ programming to provide a deep understanding of the core concepts driving software design and development at the industrial scale. With in-depth coverage of modern C++ development practices and a focus on industrial-strength, large-scale applications, this book covers everything from runtime dependencies and component design, to architecture and software development processes. Whether you are a seasoned C++ developer looking to advance your skills, or just getting started with C++ development, Expert C++: Processes and Architecture is the definitive guide to mastering the architecture of modern C++ applications.

This book is written in English and is published in paperback format by Addison-Wesley Professional. It weighs 1680 grams and has 1024 pages. The subject keywords include C++ programming language, computer applications, computer languages, how-to, do-it-yourself, monograph series, non-fiction, scholarly/undergraduate, United States, C++ architecture, C++ processes, C++ development, industrial strength C++, enterprise C++, expert C++, C++ runtime dependencies, C++ components, large scale C++, and C++ 17.

Expert C++: Processes and Architecture is the first volume in the Addison-Wesley Professional Computing series. It is intended for a general/trade audience and was published on July 28th, 2018. The item identifier codes are 4tc, 4ct, UMX, COM051070, COM051070, COM051070, UMX, and UMX. The item comes in its first edition and is produced by Addison Wesley. The packaging weight of the item is 1.656 kilograms. Whether you are an experienced C++ developer or are just starting out, Expert C++: Processes and Architecture is the must-have guide to mastering the architecture of modern C++ applications.

- **wiązący:** paperback
- **język:** english, english, english
- **waga przedmiotu:** 1680 grams
- **strony:** 1024
- **słowo kluczowe tematu:** C++ (PROGRAMMING LANGUAGE), COMPUTER, Computer Applications, Computer/Languages, How-to/Do-it-yourself, Monograph Series, any, Non-Fiction, Scholarly/Undergraduate, United States, c++ architecture; c++ processes; c++ development; industrial strength c++; enterprise c++; expert c++; c++ runtime dependencies; c++ components; large scale c++; C++ 17
