

Zmęczenie Człowieka: Ewolucja, Zdrowie i Wydajność (Seria Badawcza Routledge w zakresie Sportu i Ćwiczeń)

Indeks: 810032 Producent: Routledge

Cena: 219.57 zł

Opis

Human Fatigue: Evolution, Health and Performance (Routledge Research in Sport and Exercise Science)

Producent: Routledge

- **temat:** Sports & outdoor recreation, Sports injuries & medicine, Sports training & coaching, MEDICAL / Physiology, MEDICAL / Sports Medicine, Medical/Physiology, Medical/Sports Medicine, SPORTS & RECREATION / General, Sports & Recreation/General, ANF: Health and Wellbeing, ATP Re-synthesis, ATP Utilisation, African Hunting Dog, Bipedal Locomotion, Compound Muscle Action Potential, Early Hominins, Energy Balance, Exercise Intensities, Extant Apes, Fascicle Length, Fast Twitch Fibres, Fast Twitch Muscle Fibres, Fatigue, Frank Marino, GNW Theory, General, Genus Homo, Genus Homo; Compound Muscle Action Potential; Maximal Voluntary Contraction; Safety Factor; Fast Twitch Fibres; Bipedal Locomotion; Early Hominins; Exercise Intensities; Fast Twitch Muscle Fibres; Thermoregulatory Strategy; Shorter Hind Limbs; Fascicle Length; Maximum Voluntary Isometric Force; PT; Energy Balance; MS Patient; NRC Research Press; ATP Re-synthesis; African Hunting Dog; GNW Theory; Mg Patient; Extant Apes; Muscle Temperature; Post-synaptic Folding; ATP Utilisation, HC, HC/Medizin/Klinische Fächer, Health, Relationships and Personal development, Human biology, Klinische Fächer, MAJORS, MEDICAL, MEDICAL / Physiology, MEDICAL / Sports Medicine, MS Patient, Maximal Voluntary Contraction, Maximum Voluntary Isometric Force, Medical/Physiology, Medical/Sports Medicine, Medicine: general issues, Medizin, Mg Patient, Muscle Temperature, NRC Research Press, Non-Fiction, PT, Physiology, Physiotherapy, Post-synaptic Folding, SPORTS & RECREATION / General, Safety Factor, Shorter Hind Limbs, Sport: general, Sportmedizin, Sportverletzungen, Sports & Recreation, Sports & Recreation/General, Sports & outdoor recreation, Sports Medicine, Sports and Active outdoor recreation, Sports injuries & medicine, Sports injuries and medicine, Sports training & coaching, Thermoregulatory Strategy, environmental physiology, exercise genetics, exercise physiology, human endurance, human evolutionary biology, human fatigue, skeletal muscle, Health, Relationships and Personal development, Human biology, Medicine: general issues, Physiology, Physiotherapy, Sport: general, Sportmedizin, Sportverletzungen, Sports and Active outdoor recreation, Sports injuries and medicine, HC/Medizin/Klinische Fächer
- **wiązący:** paperback
- **język:** english, english, english
- **waga przedmiotu:** 367 grams
- **strony:** 260
- **słowo kluczowe tematu:** Compound Muscle Action Potential; Genus Homo; Frank Marino; Maximum Voluntary Isometric Force; human fatigue; NRC Research Press; human endurance; Shorter Hind Limbs; exercise genetics; ATP Re-synthesis; human evolutionary biology; Thermoregulatory Strategy; skeletal muscle; Maximal Voluntary Contraction; environmental physiology; Safety Factor; exercise physiology; Fast Twitch Fibres; Fast Twitch Muscle Fibres; Bipedal Locomotion; Early Hominins; Exercise Intensities; Fascicle Length; PT; Energy Balance; MS Patient; African Hunting Dog; GNW Theory; Mg Patient; Extant Apes; Muscle Temperature; Post-synaptic Folding; ATP Utilisation, Genus Homo; Compound Muscle Action Potential; Maximal Voluntary Contraction; Safety Factor; Fast

Twitch Fibres; Bipedal Locomotion; Early Hominins; Exercise Intensities; Fast Twitch Muscle Fibres; Thermoregulatory Strategy; Shorter Hind Limbs; Fascicle Length; Maximum Voluntary Isometric Force; PT; Energy Balance; MS Patient; NRC Research Press; ATP Re-synthesis; African Hunting Dog; GNW Theory; Mg Patient; Extant Apes; Muscle Temperature; Post-synaptic Folding; ATP Utilisation, MAJORS, Medical, Non-Fiction

- **marka:** Routledge
- **kod unspsc:** 55101500
- **kod podmiotu:** MED075000, MED084000, MED075000, MED084000, SPO000000, SPO000000, 1693, V, PSX, MB, MFG, MQS, SC, MKW, S, MKW, WS, MMS, WSD
- **grupa docelowa:** Professional and scholarly
- **waga opakowania przedmiotu:** 0.31 kilograms
- **zewnętrznie przypisany identyfikator produktu:** 0367731126, 9780367731120, 09780367731120
- **producent:** Routledge
- **tytuł serii:** Routledge Research in Sport and Exercise Science
- **autor:** Marino, Francesco
- **gatunek muzyczny:** HC, Medizin, Klinische Fächer, Sportmedizin, Sportverletzungen
- **Data publikacji:** 2020-12-18T00:00:01Z
- **numer wydania:** 1
- **nazwa przedmiotu:** Human Fatigue: Evolution, Health and Performance (Routledge Research in Sport and Exercise Science)
- **data premiery:** 2020-12-18T00:00:01Z
- **data uruchomienia strony produktu:** 2020-10-14T12:01:37.424Z

Parametry

Typ publikacji	książka
Autor	Francesco Marino
Język wydania	angielski
Waga	367 g
Liczba stron	260
Wydawca	Routledge
Data wydania	2020-12-18
